Term	Definition
conditional formula	A type of formula that will return a result only if specified conditions are met
data folding	A technique in which changes made in a query editor are not seen in the entire data set until all the data in the query is loaded
extract	Data that has been retrieved and put into storage in Power BI before future data processing
hack	A workaround used when a direct process is not possible with Power BI
naked columns	Columns in data tables that do not contain measures
query	A process of connecting lookup keys to data tables for data extraction
